INDEX

Acid Soil Studies: III. The influence of Calcium Carbonate, Calcium Oxide, and Calcium Sulfate on the Soluble Soil Nutrients of Acid Soils (paper), R. H. Robinson and D. E. Bullis, 449–459.
biological effect of treatment, 455–458
chemical effect of treatment, 454–455
effect of deficiency of phosphate on nitrification, 456–458
Alkali Soils, Some Experiments on Reclamation of Infertile, by means of Gypsum and other Treatments, (paper), P. L. Hibbard, 125–134
Aluminum phosphate, agricultural value of, 355–409
Aluminum Salts and Acids at Varying Hydrogen-ion Concentrations, in Relation to Plant Growth in Water Cultures (paper), S. D. Conner, and O. H. Sears 23–41
relative toxicity to rye, pop-corn and barley, 24–26
effect of acid radicals, 25–26
effect of growth upon reaction of nutrient 25–28
effect of strength of nutrient on growth 27–28
comparison of salt and acid, 27–29
comparison of three nutrient solutions 29–31
Aluminum Salts in the Soil, The Nature of, and their Influence on Ammonification and Nitrification (paper), I. A. Denison, 81–106
nature of aluminum salts, 82–86
formation of soluble aluminum, 82–83
soluble hydroxide in extracts, 83–86
aluminum salts extracted with KNO_3, 87–89, 91–95
hydrosol of aluminum hydroxide, 89
effect of extracting acidity, 90–91
aluminum in water extracts, 95–97
solubilizing of aluminum by bacteria 97–105
nitrification, 98–99
sulfofication, 99
influence of salts on ammonification and nitrification, 99–103
effect of fertilizers, 90–104
reduction of toxicity by calcium carbonate, 103–104
relation of salts to acidity, 90–91, 97–99
Ammonification, effect of—
aluminum salts on, 99–103
moisture on, 251–270
salts on, 251–270
tree products on, 303–322
Auten, J. T. (paper), The Organic Phosphorus Content of some Iowa Soils, 119–124
Azofication in Soil, Influence of Salts on (paper), J. E. Greaves, E. G. Carter, and Yeppa Lund, 481–499
influence of sodium salts, 482–484
potassium salts, 485
calcium salts, 486–487
magnesium salts, 487–488
manganese salts, 488–490
iron salts, 490–491
chlorides, 491–492
sulfates, 492–493
nitrates, 493–495
carbonates, 495–497
Bacteria—
influence of, on solubility of aluminum salts, 97–105
sulfur oxidizing, isolation of, 329–338
nodule producing, effect of reaction on, 273–274
Bacterial Activities of the Soil, The Influence of Moisture and Soluble Salts on the (paper), J. E. Greaves and E. G Carter, 251–270
Bacteriological Activities in Soil: Effect of Tree Products on, I. Ammonification and Nitrification (paper), W. M. Gibbs and C. H. Werkman, 303–322.
effect of—
sawdust on ammonification, 309–310
tree products on ammonification, 310–311
sawdust on nitrification, 311–315

sawdust in presence of $CaCO_3$, 315
tree products on nitrification on, 315–318
sawdust and tree products on denitrification, 318–319.
Bauer, F. C., and Haas, R. R. C. (paper), The Effect of Lime, Leaching, Form of Phosphate and Nitrogen Salt on Plant and Soil Acidity and the Relation of these to the Feeding Power of the Plant, see Plant, Feeding Power, etc. 461–479
Boyoucos, G. (paper), A Study of the Fertility of the Soils of Greece; see Greece, etc., 63–79
Bryan, O. C. (paper), Effect of Different Reactions on the Growth and Nodule Formation of Soybeans; see, Reactions, Effect of, etc., 271–302
Buffer effect of acid silicates, 19
Bullis, D. E., Robinson, R. H., and (paper), Acid Soil Studies: III. The influence of Calcium Carbonate, Calcium Oxide, and Calcium Sulfate on the Soluble Soil Nutrients of Acid Soils; see Acid Soil Studies, etc., 449–459
Calcium phosphate, insoluble mineral, value of, 355–409
Carbon—
dioxide, measurement of, in a system with growing plants, 144–146
Factor, on the Use of the Conventional, in Estimating Soil Organic Matter (paper), J. W. Read and R. H. Ridgell, 1–6
nitrogen ratio, effect of, on proteins in wheat, 137–138
Carter, E. G., Greaves, J. E., and (paper), The Influence of Moisture and Soluble Salts on the Bacterial Activities of the Soil, 251–270
Carter, E. G., Greaves, J. E., and Lund, Yeppa (paper). Influence of Salts on Azofication in Soil; see Azofication, etc., 481–499
Clark Hydrogen-Electrode Vessel and Soil Measurements, The (paper), D. J. Healy and P. E. Karraker, 323–328
description, 323–324
tests for accuracy, 324–326
comparison of results with Wherry's method and lime requirement, 326–327
Colloids, effect of, on "unfree" water, 52
Conner, S. D., and Sears, O. H. (paper), Aluminum Salts and Acids at Varying Hydrogen-ion Concentrations, in Relation to Plant Growth in Water Cultures; see Aluminum Salts, etc., 23–41
Crone's nutrient, growth of soybeans in, 279–380
Cultivation, effect of, on soluble salt content of soils, 447
Denison, I. A. (paper), The Nature of Aluminum Salts in the Soil and their Influence on Ammonification and Nitrification; see Aluminum Salts, etc. 81–106.
Denitrification, effect of sawdust and tree products on, 303–327
Dilatometer classification of soil moisture, 43–54
Drying Soils, effect of, on the Water Soluble Constituents (paper), A. F. Gustafson, 173–213.
effect of—
oven drying on soluble solids and nitrates, 186–187
nine weeks' storage on soluble solids, 187–192
drying on soluble solids and nitrates in swamp soils, 192–194
oven-drying on soluble solids in fine soils with various carbon contents, 194–197
determination of hygroscopic coefficient, 197–201
retention of nitrate by quartz and white silt loam, 201–207
Environment vs. heredity, effect of, on protein content of wheat, 137
Erosion, effect of, in Greece, 67–76
Ewing, (paper), The Movement of Saturated Water Vapor through Quartz Flour, 57–61.
Ferrous sulfate, effect of, on soil solution, 55–56
Fertilizers—
effect of salts on ammonification, 251–270
time of application of, effect on proteins in wheat, 135–138
Formosa Island, The Laterite Soils of (paper), K. Shibuya, 425–431
Gericke, W. F. (paper), Certain Relations between the Protein Content of Wheat and the Length of the Growing Period of the Headbearing Stalks; see, Wheat, etc., 135–138.
Gibbs, W. M., and Werkman, C. H. (paper), Effect of Tree Products on Bacteri-

ological Activities in Soil: I. Ammonification and Nitrification; see, Bacteriological Activities, etc., 303–322.
Greaves, J. E., Carter, E. G., and Lund, Yeppa, (paper), Influence of Salts on Azofication in Soil; see Azofication, etc., 481–499.
Greaves, J. E., and Carter, E. G. (paper), The Influence of Moisture and Soluble Salts on the Bacterial Activities of the Soil, 251–270
Greaves, J. E., Hirst, C. T., and (paper), Factors Influencing the Determination of Sulfates in Soil; see Sulfates in Soil, etc., 231–249
Greece, The Soils of, A Study of the Fertility of (paper), G. Boyoucos, 63–79.
topography, 64
geology, 64–65
rainfall, 66
crops and yields, 66
neglected soil fertility, 67
chemical composition of the soils, 67–76
pot culture tests, 76
field tests, 76–78
effect of erosion, 67–76
Gustafson, A. F. (paper), Effect of Drying Soils on the Water-Soluble Constituents; see Drying Soils, etc. 173–213
Gypsum, effect of, on infertile alkali soils, 125–134
Haas, A. R. C., Bauer, F. C., and (paper), The Effect of Lime, Leaching, Form of Phosphate and Nitrogen Salt on Plant and Soil Acidity and the Relation of these to the Feeding Power of the Plant, see Plant, Feeding Power, etc., 461–479
Healy, D. J., and Karraker, P. E. (paper), The Clark Hydrogen-Electrode Vessel and Soil Measurements; see Clark Hydrogen, etc., 323–328
Hibbard, P. L. (paper), Some Experiments on Reclamation of Infertile Alkali Soils by means of Gypsum and other Treatments, 125–134.
Hirst, C. T., and Greaves, J. E. (paper), Factors Influencing the Determination of Sulfates in Soil; see, Sulfates in Soil, etc. 231–249
Hydrogen-ion concentration—
Clark hydrogen-electrode vessel, 323–328
effect of—
on growth of soybeans, 271–302
on nodule formation, 271–302
on toxicity of aluminum salts and acids, 23–41
in Soils, The Relation of, to their "Lime Requirement" (paper), H. W. Johnson, 7–22
effect of soil texture—
on correlation with lime requirement, 15–16
on amount and strength of soil acids, 18
comparative correlations of Veitch and Truog tests, 9–17
weathering as a cause of acidity, 19–20
buffer effect of acid silicates, 19
of nutrient, effect of growth on 25–28
Iron phosphate, agricultural value of, 355–409
Joffe, J. S. (paper), Studies of Sulfur Oxidation in Sulfur-Floats Soil mixtures; see, Sulfur Oxidation, etc., 107–118
Joffe, J. S. (paper), Sulfur Oxidizing Bacteria, Preliminary Studies on the Isolation of, from Sulfur-Floats-Soil Composts; see Sulfur Oxidizing, etc., 161–172.
Johnson, H. W. (paper), The Relation of Hydrogen-ion Concentration in Soils to their "Lime Requirement;" see Hydrogen-ion, etc., 7–22
Karraker, P. E., Healy, D. J., and (paper) The Clark Hydrogen-Electrode Vessel and Soil Measurements; see Clark Hydrogen- etc., 323–328.
Kelley, A. P. (paper), Plant Indicators of Soil Types, 411–423
Laterite soils of Formosa Island, 425–431
Leaching, effect of, on plant feeding power, 461–479
Lime—
effect of, on plant feeding power, 461–479
requirement, effect of magnesium and calcium upon, 337–354
Limes, The Effect of, Containing Magnesium and Calcium upon the Chemical Composition of the Soil and upon Plant Behavior (paper), W. Mather, 337–354
effect of limes on crop yields, 340, 343–344
effect of limes on soil reaction, 344–345
effect of lime on solubility of aluminum, 345–347
extraction of calcium and magnesium, 347–349
effect of ratio of CaO to MgO, 349

effect of limes on nitrogen and organic matter, 350–353
Lipman, C. B. (paper), Ferrous Sulfate Treatment of Soil as Influencing the Soil Solution Obtained by the Lipman Pressure Method; see Soil Solution, etc., 55–56
Lund, Yeppa, Greaves, J. E., Carter, E. J. and (paper), Influence of Salts on Azofication in Soil; see Azofication, etc., 481–499.
Magnesium in limes, effect of, 337–354
Marais, J. S. (paper), The Comparative Agricultural Value of Insoluble Mineral Phosphates of Aluminum, Iron and Calcium; see Phosphates of Aluminum, etc., 355–409.
Mather, W. (paper), The Effect of Limes Containing Magnesium and Calcium upon the Chemical Composition of the Soil and upon Plant Behavior: see Limes, etc., 337–354.
Media, for isolation of sulfur-oxidizing bacteria, 329–336
Millar, C. E. (paper), Further Studies on the Soluble Salt Content of Field Soils; see Soils, Field, etc., 433–448.
Neller, J. R. (paper), The Influence of Growing Plants upon Oxidation Processes in the Soil; see, Oxidation Processes, etc., 139–159
Nitrification
effect of—
aluminum salts on, 99–103
on solubility of aluminum salts, 98–99
tree products on, 303–322
Nitrogen salts, effect of, on plant feeding power, 461–479
Nodule formation—
effect of reaction of solution culture on, 271–302
Oxidation Processes in the Soil, The Influence of Growing Plants upon (paper), J. R. Neller, 139–159
measurement of CO_2 produced in system with growing plants, 144–146
effect of plants on oxidation of organic matter, 147–152
symbiosis of plants and oxidizing bacteria, 153–154
Organic matter, effect of plants on oxidation of, 139–159
Parker, F. W. (paper), The Classification of Soil Moisture; see, Soil Moisture, etc., 43–54
Phosphorus, Content of some Iowa Soils, The Organic (paper), J. T. Auten, 199–124
Phosphates of Aluminum, Iron and Calcium, The Comparative Agricultural Value of Insoluble Mineral (paper), J. S. Marais, 355–409
effect of lime and gypsum on availability of phosphates, 363–371
availability of phosphates in sand cultures, 371–376
effect of urea on availability of phosphates, 376–386
availability of chemically pure and ignited mineral phosphates, 386–391
solubility of $Al_3(PO_4)_3$ in alkaline solution, 391–392
solvent effect of plant roots on phosphates 392–393
Plant—
Feeding power of the, The Effect of Lime, Leaching, Form of Phosphate and Nitrogen Salt on Plant and Soil Acidity and the Relation of these to the, (paper), F. C. Bauer, and A. R. C. Haas, 461–479.
growth and acidity of soybeans, 463–465
growth and acidity of corn, 465–475
effect of NH_4NO_3 on soil acidity, 457–476
growth, effect of—
aluminum salts and acids on, 23–41
on reaction of nutrient solution, 25–28
on soluble salt content of soils, 433–448
reaction of culture solution on, 271–302
strength of nutrient on, 27–28
Indicators of Soil Types (paper), A. P. Kelley, 411–423
juices, acidity of, 461–479
roots, solvent effect of, 392–393
Plants—
effect of—
magnesium and calcium upon, 337–354
on oxidation of organic matter, 139–159
symbiosis of, and oxidizing bacteria, 153–154
Phosphate, effect of, on plant feeding power, 461–479
Rainfall, effect of, on soluble salt content of soils, 442–444
Reactions, Effect of Different, on the Growth and Nodule Formation of Soybeans (paper), O. C. Bryan, 271–302

effect on different strains of bacteria, 273–274
soybeans in Shive's nutrient, 276–278
effect of nitrates in Shive's nutrient, 278
soybeans in other nutrients, 278
soybeans in Crone's nutrient, 279–280
comparison of soybeans, corn and cowpeas, 280–281
reactions of culture medium and plant juices, 281
Read, J. W., and Ridgell, R. H. (paper), On the Use of the Conventional Carbon Factor in estimating Soil Organic Matter, 1–6
Reclamation of infertile alkali soils, 125–134

Shibuya, K. (paper), The Laterite Soils of Formosa Island, 425–431
Shive's nutrient, growth on soybeans in, 276–278
Soil—
acid, effect of calcium salts in, 449–459
acidity,
effect of NH_4NO_3 on, 461–479
effect of, on plant feeding power, 461–479
relation of, to aluminum salts, 90–91, 97–99
azofication in, influence of salts on, 481–499
determination of sulfates in, 231–249
effect of limes on composition of, 337–354
extracts—
clarification of, 243
soluble aluminum hydroxide in, 83–86
time of shaking, 245
ratio of soil to water, 244
retention of NO_3 by quartz and white silt loam, 201–207
with H_2O, aluminum in, 95–97
with KNO_3, aluminum salts in, 87–89, 91–95
moisture, effect of, on ammonification, 251–270
Moisture, The Classification of, (paper), F. W. Parker, 43–54
solids as a cause of freezing point depression, 49–52
"unfree" water as a solvent, 43–54
displacement of "unfree" water, 48–49
dilatometer classification a measure of force of adhesion, 49–52
effect of colloids on "unfree" water, 52
"unfree" water, relation of, force of adhesion to, 49–52
nutrients, effect of calcium salts on, 449–459
organic matter, use of conventional carbon factor in estimating, 1–6
solids, effect of, on freezing point depression, 49–52
Solution Obtained by the Lipman Pressure Method, Ferrous Sulfate Treatment of Soil as Influencing the (paper) C. B. Lipman, 55–56
texture, effect of,
on correlation of pH values with lime requirement, 15–16
on amount and strength of soil acids, 18
treatment by $FeSO_4$, effect of, 55–56
types, plant indicators of, 411–423
Soils—
black alkali, effect of sulfur oxidation on, 215–229
determination of hygroscopic coefficient of, 197–201
effect of—
drying on soluble solids, 173–213
storage on soluble solids, 187–192
Field, Further Studies on the Soluble Salt Content of (paper), C. E. Millar, 433–448

seasonal variations by stratum, 434–435
effect of vegetation, 435–441
effect of rainfall, 442–44
effect of cultivation, 47
laterite, of Formosa Island, 425–431
study of fertility of, in Greece, 63–79
swamp, effect of drying on soluble solids, 192–194
with various carbon contents, effect of drying on, 194–197
Solution cultures—
comparison of three nutrient solutions, 29–31
effect of aluminum salts and acids in, 23–41
effect of reaction of, 271–302
effect of strength of, on growth, 27–28
reaction of, effect of growth on, 27–28
Soybeans, effect of reaction of solution culture on, 271–302
Sulfates in Soil, Factors Influencing the Determination of (paper), C. T. Hirst, and J. E. Greaves, 231–249
effect of chlorides,236
effect of nitrates, 239
Effect of Pasteur-Chamberland filter, 243
ratio of soil to water, 244
time of shaking, 245
Sulfur—
cycle in water and soil, 161–163
in the Soil: Microörganisms Concerned in the Oxidation of, III. Media used for the Isolation of Sulfur Bacteria from the Soil (papers), S. A. Waksman, 329–336
oxidation—
by fungi, 170
effect of—
on biological flora of black alkali soils, 220–221
on physical structure of black alkali soils, 221
on reaction of black alkali soils, 216–220
in "Black Alkali" Soils (paper), W. Rudolfs, 215–229
effect of sulfur oxidation—
on alkalinity, 216–220
on biological flora, 220–221
on physical structure of soil, 221
Studies of, in Sulfur-Floats Soil Mixtures (paper), J. S. Joffe, 107–118
effect of aeration, 107–112
influence of reaction, 112–144, 116–117
course of conversion, 114–118
moisture control of cultures, 111–112
effect of SiF_4 on organisms, 117
importance of increase of weight, 111–112, 118
Oxidizing Bacteria, Preliminary Studies on the Isolation of, from Sulfur-Floats-Soil Composts (paper), J. S. Joffe, 161–172
sulfur cycle in water and in soil, 161–163
isolation of sulfur-oxidizing bacterium, 164–169
oxidation by fungi, 170
Sulfofication, effect of, on solubility of aluminum salts, 99
Toxicity, of aluminum salts and acids, 23–41
Tree products, effect of, on bacterial activity, 303–322
"Unfree" water—
as a solvent, 43–54
displacement of, 48–49
effect of colloids on, 52
relation of force of adhesion to, 49–52
